

Avinash Kamadri

Full-stack developer · AI SaaS, frontend design & backend systems

Karimnagar, Telangana, India · he/him

avinashkamadri16@gmail.com avinashk.in github.com/avikkk19 LinkedIn

> SUMMARY

Full-stack developer working on AI-powered SaaS products and workflow automation. I build user flows and dashboards on the front end, and APIs, database schemas and service logic on the back end, and I help get them deployed. I like software that makes everyday business work clearer and easier to manage.

> EXPERIENCE

Full-Stack Developer · Flashback Labs™

- Build features across a SaaS product: user flows, dashboards, CRM-style features and AI-assisted workflows.
- Work on authentication, cloud file storage, background jobs and third-party integrations.
- Design PostgreSQL schemas and ship changes through Prisma migrations.
- Help containerise and deploy services with Docker on AWS.

> PROJECTS

CreCon

React · Supabase

Creator Connect · github.com/avikkk19/crecon

- A platform where content creators post editing and design jobs, and freelance editors apply with demos.
- Email sign-in, real-time chat and file uploads built on Supabase auth, database, storage and edge functions.

Flashback mobile app

React Native · Expo

github.com/avikkk19/Flashback-native-app

- Selfie capture with on-device liveness detection using MediaPipe face landmarks.
- OTP sign-in with JWTs, and upload of the captured image.

DrunkDragon

MERN

F1 blog platform · github.com/avikkk19/drunkdragon

- A blogging site for Formula 1 fans: React front end, Express and MongoDB API.
- JWT and Google sign-in through Firebase, with image uploads to AWS.

avinashk.in

HTML · JS · three.js

- A personal site you can drive like a terminal, with slash commands, a blog and a 3D Red Bull RB18 lapping Spa in the footer.

> SKILLS

Languages	JavaScript, TypeScript, Python, C, HTML, CSS, SQL
Frontend	Next.js, React, React Native, Tailwind CSS
Backend	NestJS, Node.js, Express
Data	PostgreSQL, Prisma, MongoDB, Supabase
Infra	Docker, AWS, Vercel
AI	ML agents, AI-assisted workflows
